INTRODUCTION:

Let's Get Real About Marketing Your Health Practice

Hey there!

If you're reading this, you're probably amazing at what you do - whether that's functional medicine, dentistry, chiropractic, health coaching, or any other health-focused practice. But let me guess... marketing? Not so much.

I get it. You didn't spend all those years studying and perfecting your craft just to become a marketing expert. The problem is, without solid marketing, even the best practitioners struggle to fill their practice.

That's exactly why I created this playbook. After helping hundreds of health practitioners transform their marketing (and watching just as many struggle), I've broken it down into 5 essential steps that actually work.

This isn't theory. These aren't general marketing tips that could apply to any business. This is specifically for you - the health practitioner who knows they need to market their practice but doesn't know where to start.

HOW TO USE THIS PLAYBOOK

Before we dive in, let's get clear on what you'll have or at least start exploring by the time you finish this playbook:

1. A crystal-clear offer that makes potential clients think **"OMG, I need this!"**
2. An **authentic presence** that builds trust and credibility
3. A **proof portfolio** that shows you get results
4. A **content creation system** that doesn't eat up all your time
5. An **implementation plan** that actually works

START HERE: Take the Marketing Power Score Assessment below. This will show you exactly where you need to focus your energy.

POWER MOVE #1: **CREATE YOUR SIGNATURE OFFER**

Listen up, because this is where most health practitioners completely miss the mark. You're probably sitting there thinking, "But Lauren, I offer amazing services!" Sure you do – but are you packaging them in a way that makes potential clients think "OMG, I NEED THIS!"?

The Truth About Your Offer

Here's what I see ALL THE TIME:

- Functional medicine docs listing out lab tests (yawn)
- Health coaches offering "12-week programs" (what does that even mean?)
- Chiropractors advertising "adjustments" (just like everyone else)
- Naturopaths talking about "whole body wellness" (too vague!)

Let me be real with you – nobody wakes up thinking "Gee, I really need some functional medicine today!" They wake up thinking "Why am I so damn tired all the time?" or "Will I ever get rid of these migraines?"

What Makes a Killer Offer?

Your offer needs to be:

- Crystal clear (if you can't explain it to a 5-year-old, it's too complicated)
- Results-focused (what transformation are you creating?)
- Unique to YOU (what's your special sauce?)
- Easy to understand (stop with the medical jargon!)
- Priced right (and yes, you're probably undercharging)

POWER MOVE #2:

BE A WALKING BILLBOARD FOR YOUR WORK

Y'all, this one's crucial – you've got to BE what you teach. And I don't mean in some fake, polished, Instagram-perfect way. I mean in a real, authentic, "yeah, I actually do this stuff" way.

THE REALITY CHECK

If you're:

A weight loss coach who's struggling with their own weight

A stress management expert who looks stressed AF

A skin specialist with problematic skin

A health expert who's always sick

...we need to talk.

Now, I'm NOT saying you have to be perfect. Hell no! But you do need to be actively walking your talk. Your potential clients need to look at you and think "I want some of what they've got!"

- Be real about your challenges

- What you eat
- Your self-care practices

3. Be Authentically You

- Stop trying to be "professional"
- Share your personality
- Let your quirks shine

Every time you:
